Smart

Project 516

Project 516 is based on the concept that washing machines are smart devices and should be a part of a smart laundry process.

They should be Fast and always Connected with you.

Every 516 machine is a technologically advanced washer that will change the way you do your laundry.

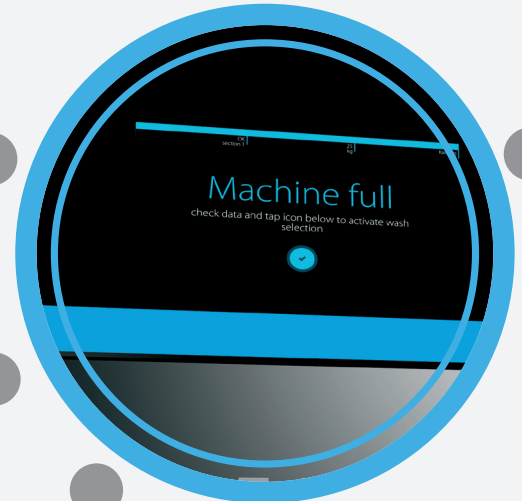

Concept

516 ironer

516 dryer

516 washer

Connected

Connect washer and laundry basket. Washer and dryer. And add your smart watch. Any time. From anywhere.

At any moment you can be on track with your washing process.

You can check:

- which washing machines are currently washing,
- who started the washing process,
- who is the client you are washing for,
- what is the weight and type of laundry,
- which program is used,
- at what stage of washing is an individual washer,
- what is the current temperature and water level,
- and more.

Fast.

Project 516 offers you fast, effective washing ultimately saving time and money.

Forget all the buttons and 20 taps to laundry start.

With Krebe Tippo 516 washing machine you can start washing your laundry in 2 steps. From anywhere.

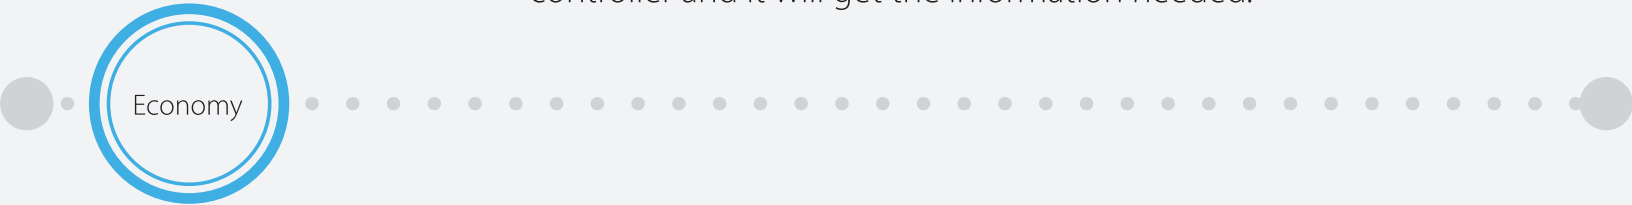

User and laundry smart cards do all the work

By using a pre-programmed user or laundry cards, there is really not much to do before you tap start.

The card can contain all the basic information about:

- user,
- client,
- type and quantity of laundry,
- program,
- other technical information.

All you have to do is place the card near the washing machine controller and it will get the information needed.

Smart.

The 516 washing machine is a smart device and is part of a smart process.

With 516 system you can exchange data and commands with Krebe-Tippo machines.

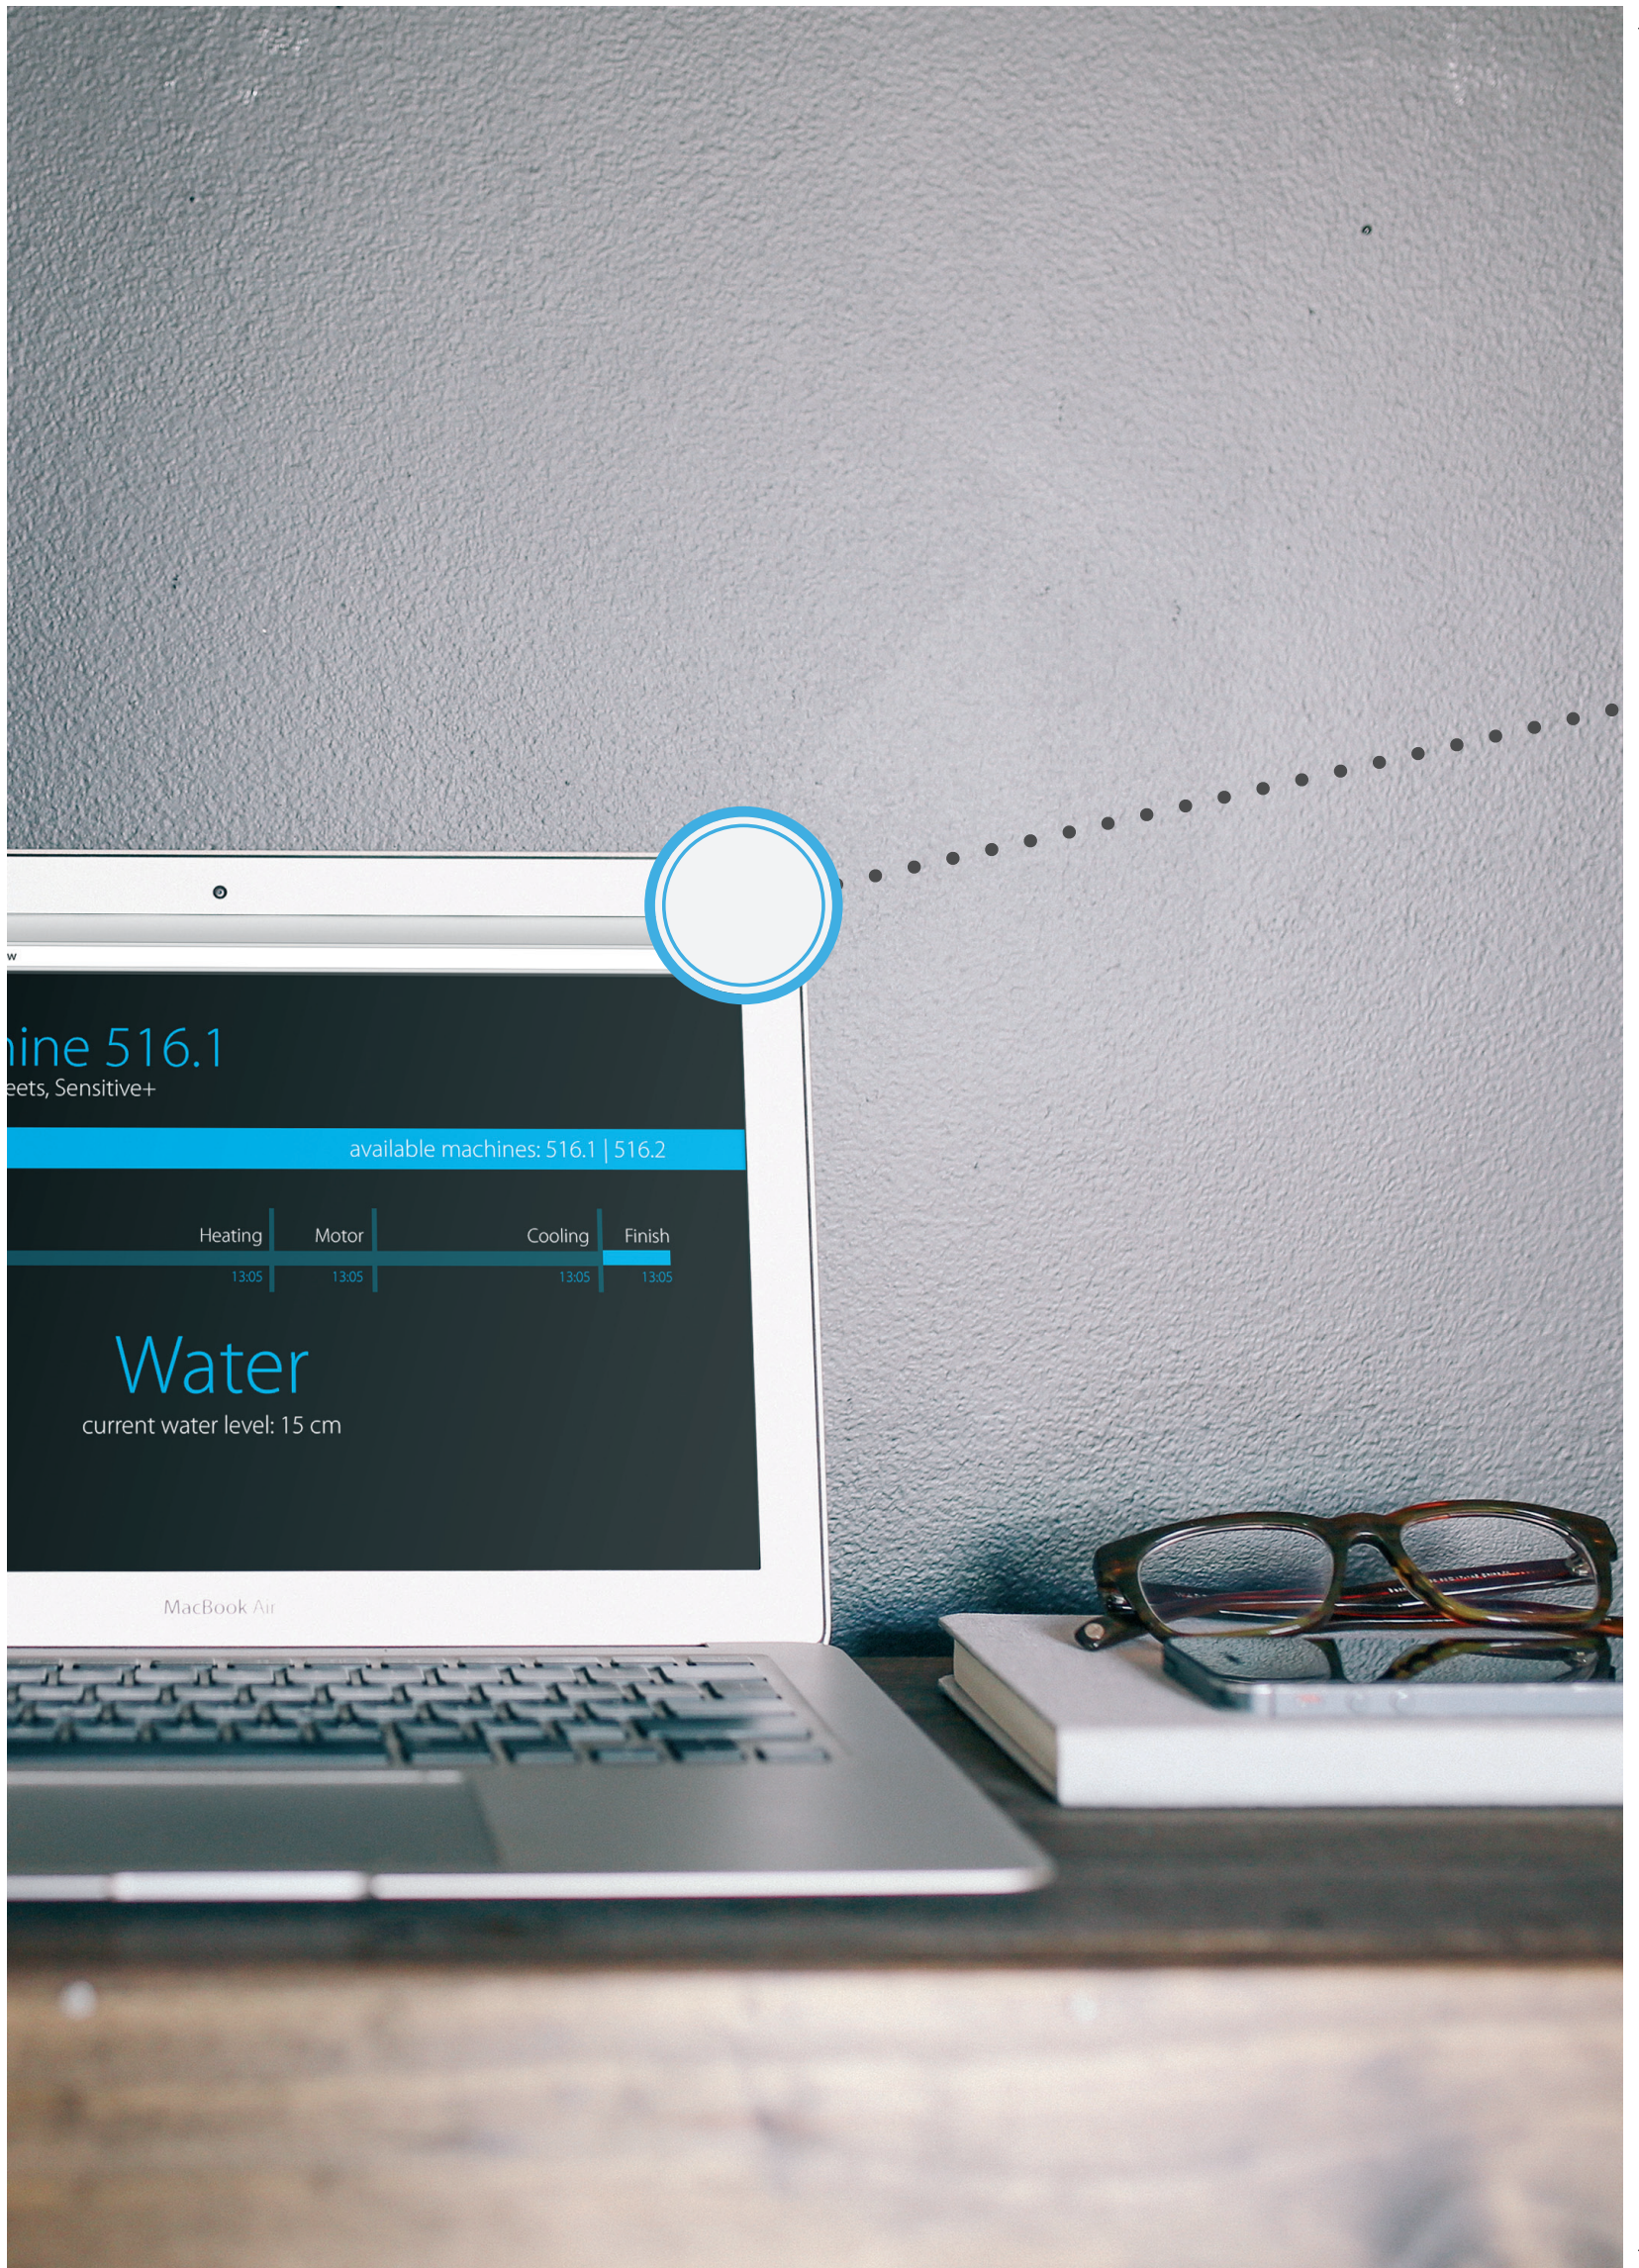

This enables other devices to:

- check the machine status
- start, pause or stop the washing process
- check, change and update the washing programme
- get all statistical data
- get information about important issues like water consumption or other possible errors

And there is so much more left for your imagination. You can connect the 516 machines to other machines in your laundry by our extensive and documented Accessible Programming Interface (API).

Solution

Machine 516.1
sheets, Sensitive+

available machines: 516.1 | 516.2

Heating	Motor	Cooling	Finish
13:05	13:05	13:05	13:05

Water
current water level: 15 cm

MacBook Air

Wherever.

In your own design.

Krebe Tippo 516 machines are securely accessible through the networks.

You can be at work, driving on the bus or relaxing on the couch in your living room.

Total control and all information about your washing machine(s) is always available.

Personal

Whatever.

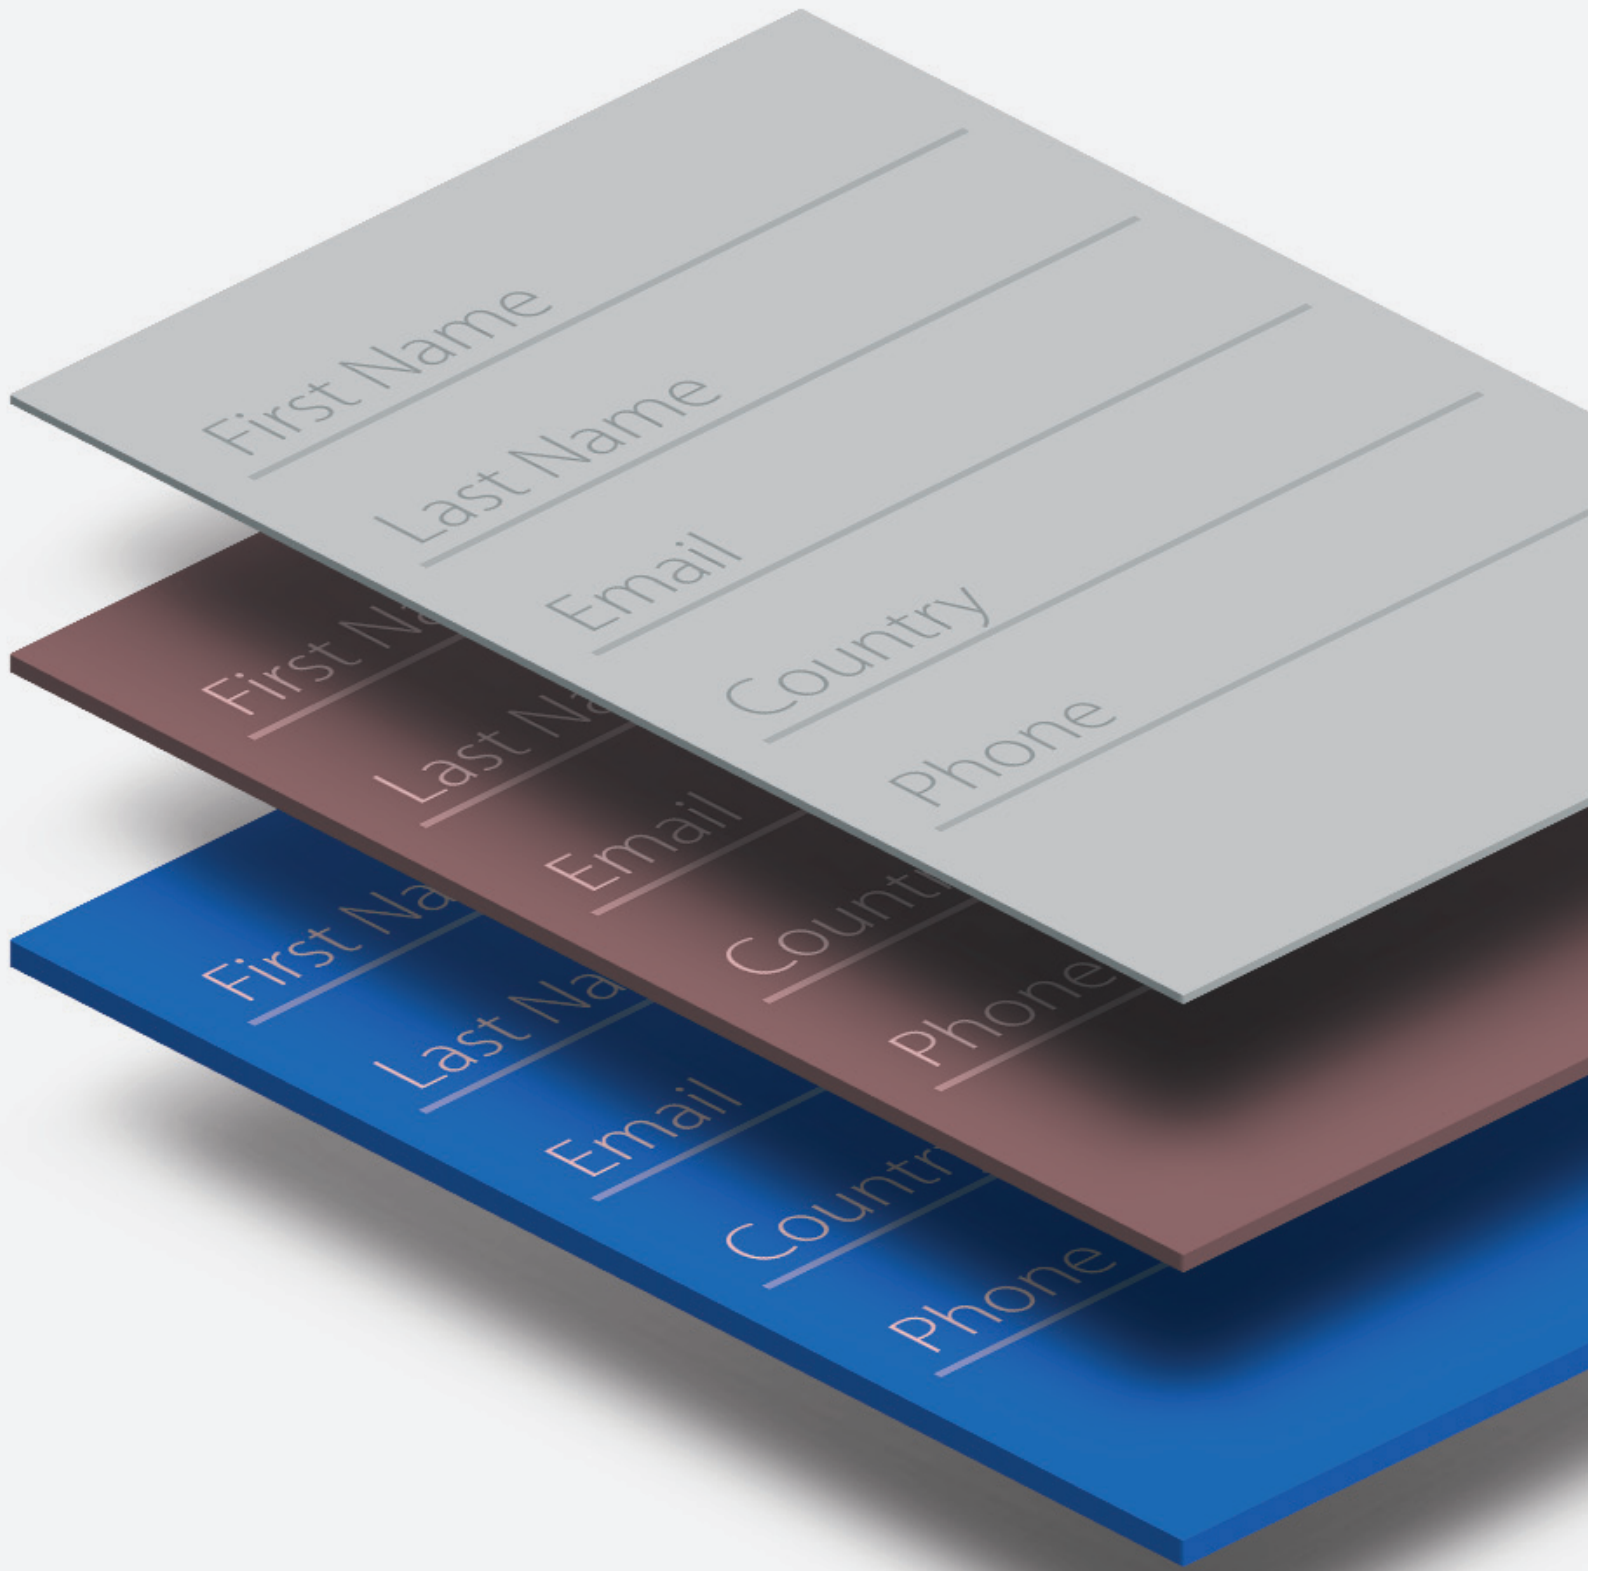

Computer.
Mobile phone.
Tablet.
Smart watch.

We already have computers, mobile phones, tablets and smart watches.

Future brings us many new smart devices. Laundry baskets. Ironers. Tunnels. Even the sheets and other laundry itself.

And Krebe Tippo 516 machine is ready for them. To get connected. And making the washing process smarter.

Future

Available.

Krebe - Tippo 516 washer will be released in year 2016.
